Mandaue City, Cebu

Skills

- SQL (MySQL and SQLite)
- Python (Pandas, NumPy, SciPy, MatPlotLib)
- Microsoft PowerBI
- Excel (, Pivot Tables and Pivot Charts)

Projects

RETAIL SALES & INVENTORY – Personal Project – Mandaue City, Philippines November 2025

- Cleaned and prepared retail sales data in Excel by removing duplicates and handling missing values.
- Analyzed monthly sales trends, category performance, and regional distribution using Pivot Tables and Charts.
- Built an interactive Excel dashboard with KPIs (Total Orders, Total Sales, Net Sales, Avg. Discount) and slicers for filtering.

LAYOFFS DATESETS – Personal Project - Mandaue City, Philippines October 2025

- Cleaned a tech layoffs dataset (2020–2025) using MySQL, removing duplicates with ROW_NUMBER() window functions.
- Standardized data using TRIM and STR_TO_DATE to correct text inconsistencies and date formats.
- Handled missing values by converting blanks to NULL and using self-joins to fill missing industry data.
- Created staging tables to transform raw data into a clean dataset ready for analysis.

DATA PROFESSIONAL SURVEY BREAK – Personal Project – Mandaue City, Philippines December 2025

- Cleaned and transformed survey data using Power Query by removing duplicates and handling missing values.
- Built an interactive Power BI dashboard to analyze salary trends, work-life balance, and entry difficulty in data roles.
- Created visualizations to show programming language popularity and geographic distribution.
- Identified insights such as Python being the most used language and Data Scientists having the highest average salary.

CUSTOMER CALL LIST – Personal Project – Mandaue City, Philippines February 2026

- Cleaned a customer call list dataset using Python (Pandas) by removing duplicates and irrelevant columns.
- Standardized phone numbers, names, and categorical fields using data transformations.
- Split address data into street, state, and zip columns for better structure.
- Filtered records based on contact preferences and valid phone numbers to create a clean dataset for analysis.

Work Experience

DATA ANALYST – Cebu Tele-net Philippines Corp. – F. Cabahug St., Kasambagan, Cebu City May 2025 - Present

- Analyzed large volumes of customer-submitted URLs to identify patterns, categorize content, and support operational decision-making.
- Cleaned and prepared data by removing duplicates and standardizing URL formats to ensure accurate database uploads.
- Investigated customer disputes and inquiries by reviewing and validating URL data and related records.

Documented and summarized daily analysis results to create clear turnover reports for the next shift

Education

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY – Cebu Institute of Technology – University –N. Bacalso Avenue, Cebu City, Philippines, 6000 May 2025
